Marathi

PERSONAL SKILLS

- CREATIVE
- PUNCTUAL
- ACTIVE
- HELPING NATURE
- WILLING TO LEARN NEW THINGS
- HARD WORKING
- FRIENDLY AND OUTGOING
- DETERMINED

PROJECTS

PROJECT 1 : BOLLYWOOD STYLE

Description: The project upgraded my skill set by utilizing React JS technology and CSS components, which were explored with fresh ideas and zeal. Throughout the process, I bought, explored, and learned using Redux two-way data flow.

- **Responsibilities :**
- UI development with HTML, CSS, and REACT JS.
- Redux is utilized for application-level state management along with bug fixes.
- CSS3 and Media Queries are used in responsive web design.
- Highly complicated components are designed utilizing HTML files and third-party packages such as React Hook Form, Material UI, AXIOS, and Bootstrap.
- React Hooks and JavaScript provided all the components with functionality based on events.
- Creating and using interactive and dynamic elements.
- Code pulls and pushes to a GitHub repository.
- Created and designed static and dynamic components per the specifications of the skill set.
- Obtaining the data from the back-end source's APIs and methodically presenting it on the user interface in accordance with the wireframe.

PROJECT 2 : SOFTCADIA

Description : The project upgraded my skill set by utilizing React JS technology as well as CSS elements, which were explored with creative concepts. I used Redux one-way data flow to shop, explore, and pick up new skills as I went.

- **Responsibilities :**
- using HTML, CSS, and REACT JS to create user interfaces.
- Redux is used for bug fixes and application-level state management.
- adaptable website design with Media Queries and CSS3.
- Using HTML files and outside technologies like Material UI, AXIOS, Bootstrap, react-hook-form, etc. to design incredibly complex components.
- All of the components received functionality depending on events through the use of React Hooks and JavaScript.
- developing and using adaptable and responsive components.
- downloading and uploading from a GitHub repository.
- constructing both dynamic and static components according to guidelines provided by a skill set.
- retrieving the data via the APIs of the back-end source and carefully presenting it on the user interface in compliance with the framework that has been supplied.
