MERN FULL STACK DEVELOPER

Highly motivated Computer Science graduate with a strong foundation in full-stack web development. Proficient in the MERN stack (MongoDB, Express.js, React, Node.js) and dedicated to building responsive, scalable, and user-centric web applications. A quick and enthusiastic learner with a passion for problem-solving, clean code, and leveraging modern technologies to create impactful software solutions. Seeking an entry-level developer role to apply technical skills and contribute to a dynamic team.

KEY COMPETENCIES

- Problem-Solving
- Collaboration & Teamwork
- Attention to Detail
- Adaptability
- Communication
- Continuous Learning
- Work Ethic
- Language Proficiency
- Time management

PROJECTS

Example project 1: E-commerce web application

Oct 2022 - Dec 2022

A full-stack project showcasing the ability to handle a complex application with multiple features.

- **Technologies:** MERN Stack, Redux, JWT, Stripe API, Cloudinary (for image uploads), Material-UI (or other styling framework).
- Key Features:
 - Secure user authentication (sign-up, login, logout) with JSON Web Tokens (JWT).
 - Shopping cart functionality with adding, removing, and updating product quantities.
 - Seamless integration of a payment gateway (e.g., Stripe) for secure transactions.
 - User-friendly product catalog with filtering, sorting, and search capabilities.
 - Admin dashboard for managing products, users, and orders.
- Future Upgradation: To implement secure payment processing using Stripe API, resulting in a seamless user checkout experience."

Example project 2: Social media dashboard

Feb 2023 - May 2023

A project to demonstrate the understanding of real-time communication and complex data visualization.

- **Technologies:** MERN Stack, Socket.io, React Hooks, Chart.js (or Recharts).
- Key Features:
 - Real-time chat and messaging functionality using Socket.io.
 - Interactive dashboard displaying user engagement metrics using dynamic charts.
 - CRUD operations for creating, updating, and deleting posts.
 - User profile pages displaying personal activity and connections.
 - Responsive design ensuring functionality across desktop and mobile devices.
- Highlight: "Developed a real-time analytics dashboard with Socket.io and Chart.js, providing users with live data visualizations of their post engagement."

Example project 3: Task management tool (similar to Trello)

A practical project showcasing proficiency with databases and user management.

- **Technologies:** MERN Stack, Drag-and-drop libraries (e.g., React-DnD), Mongoose.
- Key Features:
 - Intuitive drag-and-drop interface for managing tasks and boards.
 - Robust user authentication system for secure access.
 - CRUD operations for tasks, lists, and boards.
 - Database schema designed to manage complex relational data.
- Highlight: "Built a project management tool with React and a custom drag-and-drop interface, improving task organization and user efficiency."

EDUCATION

Bachelor of Computer Science (BCS)

S.R.T.M University, CGPA: 8.11

HSC

Maharashtra State Board, Percentage: 92.33%

SSC

Maharashtra State Board, Percentage: 77.66%

SKILLS

- MERN Stack: MongoDB, Express.js, React, Node.js, Mongoose
 - Languages: JavaScript (ES6+), HTML5, CSS3, Python
 - Frontend: React.js, Redux, Context API, AJAX, RESTful APIs, Bootstrap, Tailwind CSS
 - Backend: Node.js, Express.js, RESTful APIs, JWT, Authentication
 - Databases: MongoDB, SQL
 - Tools & Platforms: Git, GitHub, VS Code, Postman, (Heroku, Netlify, Docker)
 - Concepts: DSA, Object-Oriented Programming, MVC Architecture, Responsive Web Design
-
