PROFILE

Highly motivated Computer Science graduate with a strong foundation in full-stack web development. Proficient in the MERN stack (MongoDB, Express.js, React, Node.js) and dedicated to building responsive, scalable, and user-centric web applications. A quick and enthusiastic learner with a passion for problemsolving, clean code, and leveraging modern technologies to create impactful software solutions. Seeking an entry-level developer role to apply technical skills and contribute to a dynamic team.

PROJECTS

project 1:E-commerce Web Application Oct 2022-Dec 2022

A full-stack project showcasing the ability to handle a complex application with multiple features.

Technologies: MERN Stack, Redux, JWT, Stripe API, Cloudinary (for image uploads), Material-UI (or other styling framework).

project 2: Social media dashboard Feb 2023 - May 2023

A project to demonstrate the understanding of real-time communication and complex data visualization. Displayed a real-time analytics dashboard with Socket.io and Chart.js, providing users with live data visualizations of their post engagement.

Technologies: MERN Stack, Socket.io, React Hooks, Chart.js (or Recharts).

project 3: Task management tool (similar to Trello) Dec 2024- Feb 2025

Built a project management tool with React and a custom drag-and-drop interface, improving task organization and user efficiency. A practical project showcasing proficiency with databases and user management

Technologies: MERN Stack, Drag-and-drop libraries (e.g., React-DnD), Mongoose.
