

YOUR NAME

Aspiring Data Scientist | Python | Machine Learning | SQL | Data Visualization

Email: yourname@email.com | Phone: +91-9876543210 | LinkedIn: linkedin.com/in/yourname | GitHub: github.com/yourname

Professional Summary

Motivated and detail-oriented fresher with strong foundational knowledge in Data Science, Machine Learning, Python, SQL, and Data Analytics. Passionate about solving real-world problems using data-driven approaches. Seeking an entry-level opportunity to apply analytical and technical skills while learning and contributing to organizational growth.

Technical Skills

Programming	Python, R (Basic)
Data Analysis	Pandas, NumPy, Excel
Visualization	Matplotlib, Seaborn, Power BI, Tableau (Basic)
Machine Learning	Scikit-learn, Regression, Classification
Database	SQL, MySQL
Tools	Jupyter Notebook, VS Code, Git

Education

Master of Computer Applications (MCA)

Your University Name — 2024 - 2026

CGPA: 8.0/10 (Example)

Projects

Sales Prediction using Machine Learning

- Built a predictive model using Linear Regression to forecast sales trends.
- Performed data cleaning, feature selection, and visualization using Pandas and Matplotlib.
- Improved prediction accuracy through model evaluation techniques.

Movie Recommendation System

- Developed a recommendation system using collaborative filtering techniques.
- Used Python libraries and similarity algorithms to suggest movies based on user preferences.

Certifications

- Python for Data Science — Coursera / Udemy
- Machine Learning Basics — Google / IBM
- SQL for Data Analysis — HackerRank / Coursera

Achievements & Activities

- Participated in college coding and analytics competitions.
- Completed mini projects in data analysis and visualization.
- Strong communication, teamwork, and problem-solving abilities.

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
